Happy birthday Cell Penetrating Peptides: 20 years ago, the concept of protein transduction domain (PTD) or cell-penetrating peptides (CPPs) was proposed based on the observation that some proteins, mainly transcription factors, could shuttle within cells and from one cell to another. Nowadays, CPPs constitute very promising tools for non-invasive cellular import of cargos and have been successfully applied for *ex-vivo* and *in vivo* delivery of therapeutic molecules and are currently entering the clinic.

Publication information: *Biochimica et Biophysica Acta (Biomembranes)* (ISSN 0005-2736). For 2010, Volume 1798 (12 issues) is scheduled for publication. Subscription prices are available upon request from the Publisher, from the Regional Sales Office nearest you, or from this journal's website (<http://www.elsevier.com/locate/bbamem>). Further information is available on this journal and other Elsevier products through Elsevier's website (<http://www.elsevier.com>). Subscriptions are accepted on a prepaid basis only and are entered on a calendar year basis. Issues are sent by standard mail (surface within Europe, air delivery outside Europe). Priority rates are available upon request. Claims for missing issues should be made within six months of the date of dispatch.

USA mailing notice: *Biochimica et Biophysica Acta (Biomembranes)* (ISSN 0005-2736) is published monthly by Elsevier B.V., The Netherlands. Periodicals postage paid at Rahway, NJ 07065-9998, USA, and at additional mailing offices. **USA POSTMASTER:** Send change of address to *Biochimica et Biophysica Acta (Biomembranes)*, Elsevier, Customer Service Department, 11830 Westline Industrial Drive, St. Louis, MO 63146-3313, USA. **ARFREIGHT AND MAILING** in the USA by Mercury International Limited, 365 Blair Road, Avenel, NJ 07001-2231, USA. **Orders, claims, and journal inquiries:** Please contact the Regional Sales Office nearest you.
